

Utilizing Privately Owned Vehicles for Conferences

Effective Immediately:

Students traveling to attend conferences in or out of state will not be approved to travel utilizing their own private vehicle.

The college is exposed to a higher level of risk for the following reasons:

1. Unknown awareness of the driver's driving history
2. Unknown awareness of the condition of the vehicle in use
3. No knowledge whether driver has the proper insurance

MATC needs to insure that when students are traveling they are provided the best and safest condition of travel possible.

It is recommended that advisors take the opportunity to enroll in a defensive driving class as soon as possible, since this requirement is part of the approval process to operate a vehicle.

It is understood that this change will require additional coordination and the Office of Student Life will do everything possible to help the student organizations and clubs have a safe travel to and from the approved conference.

If there any are any questions, please contact the Student Life Coordinator on your campus or Archie Graham, Director of Student Life.
